## ABOUT ME

I've recently completed the Monash Bootcamp in Full Stack Software Engineering. I'm based in Melbourne, fully equipped and ready to enter the industry.

The digital revolution is transforming every industry. Working in the Early Childhood Industry I've seen technology make its way into companies having a positive impact on administrative accuracy and workflow. Which is why I've chosen to transition into the world of software.

I love to collaborate on team projects to encourage cross-team communication and knowledge exchange. While equally confident to work alone and self-educate when needed.

I pride myself on always learning something new from kayaking to acting as well as professional development.

When it comes to software I have a passion for responsive design and clean code. I'm self motivated and enjoy problem solving. I have a great eye for design and attention to detail.

## WHAT I'M MOST PROUD OF

"I started travelling overseas in my 20's, I've lived in many different countries. I love learning about new cultures and shared psychology. Things didn't always go to plan, I developed confidence and resilience through these experiences.

# Lee Templeton

## FULL STACK SOFTWARE ENGINEER

### EDUCATION

#### Monash University

FULL STACK BOOTCAMP | NOV 2020 TO MAY 2021

#### University Of Otago
